## COMPUTER SCIENCE STUDENT

-  908-331-7327
-  andytiban12@gmail.com
-  andersontibantech.github.io
-  North New Jersey

## PROFILE

I am a first-year computer science student with six months of experience as a software developer intern. Strong problem solving skills along with a great desire to learn and grow in the software development field.

## SKILLS

- Python
- Java
- HTML & CSS
- GitHub
- Linux

## EXPERIENCE

### SOFTWARE DEVELOPER INTERN

Bank of America - Jersey City, New Jersey  
February 2022 - August 2022

- Created Python Ansible Database Module Plugin. Used to automate database schema, table changes, and retrieve data. The application saves at least 30 minutes of manual work.
- Modified Python script from version 2.7 to version 3. The script is used by senior-level management in CTO and CTI which is required to measure service reliability and stability trends. Updating the Python script provides adherence to bank-approved software, software support, and reduced known security vulnerabilities.
- Enhanced Email Alerting Application, involving creating and modifying SQL queries, and python code. New modifications added the ability to send emails to recipients in the regions of North America, Europe, and India at 9 AM and 5 PM in each respective time zone.

## EDUCATION

### UNION COLLEGE - CRANFORD, NJ

Fall 2022 - Present

### YEARUP - NEWYORK

September 2021 - July 2022

- 200+ hours of training in Software Development as part of a one-year career development program. That includes a six month internship.
